B3
6. (Amended) A computer program product for calibrating a camera, the computer program product comprising a computer usable medium having computer readable code thereon, including program code which:
- retrieves a digitized image of a blank textureless surface having a uniform illumination; and
 - computes intrinsic parameters of the camera based on drop off effects in the digitized image caused by a vignetting effect.
7. (Amended) The computer program product as claimed in claim 6 wherein the drop off effects are also caused by an off-axis pixel projection effect.

B4
11. (Amended) A computer system comprising:
- a memory system;
 - an I/O system connected to the memory system;
 - a storage device connected to the I/O system; and
 - a calibration routine located in the memory system responsive to a request for calibrating a camera which:
- retrieves a digitized image of a blank textureless surface having a uniform illumination; and
 - computes intrinsic parameters of the camera based on drop off effects in the digitized image caused by a vignetting effect.
12. (Amended) The computer system as claimed in claim 11 wherein the drop off effects are also caused by an off-axis pixel projection effect.

16. (Amended) An apparatus for calibrating a camera comprising:
- means for digitizing an image of a blank textureless surface having a uniform illumination; and
 - means for computing intrinsic parameters of the camera based on drop off effects in the digitized image caused by a vignetting effect.
